

From Cocoa Fields in Ghana to German Supermarkets

Unequal Exchange in the Global Cocoa Economy

Minimal Farmer Returns

Supporting Detail:
Farmers receive a small fraction of the final German retail price.

The Core-Periphery Model

Supporting Detail:
Farmers receive a small fraction of the final German retail price

Ethical Interventions

Supporting Detail:
Tony's uses "Bean Tracker" and higher premiums to redistribute value to cooperatives.

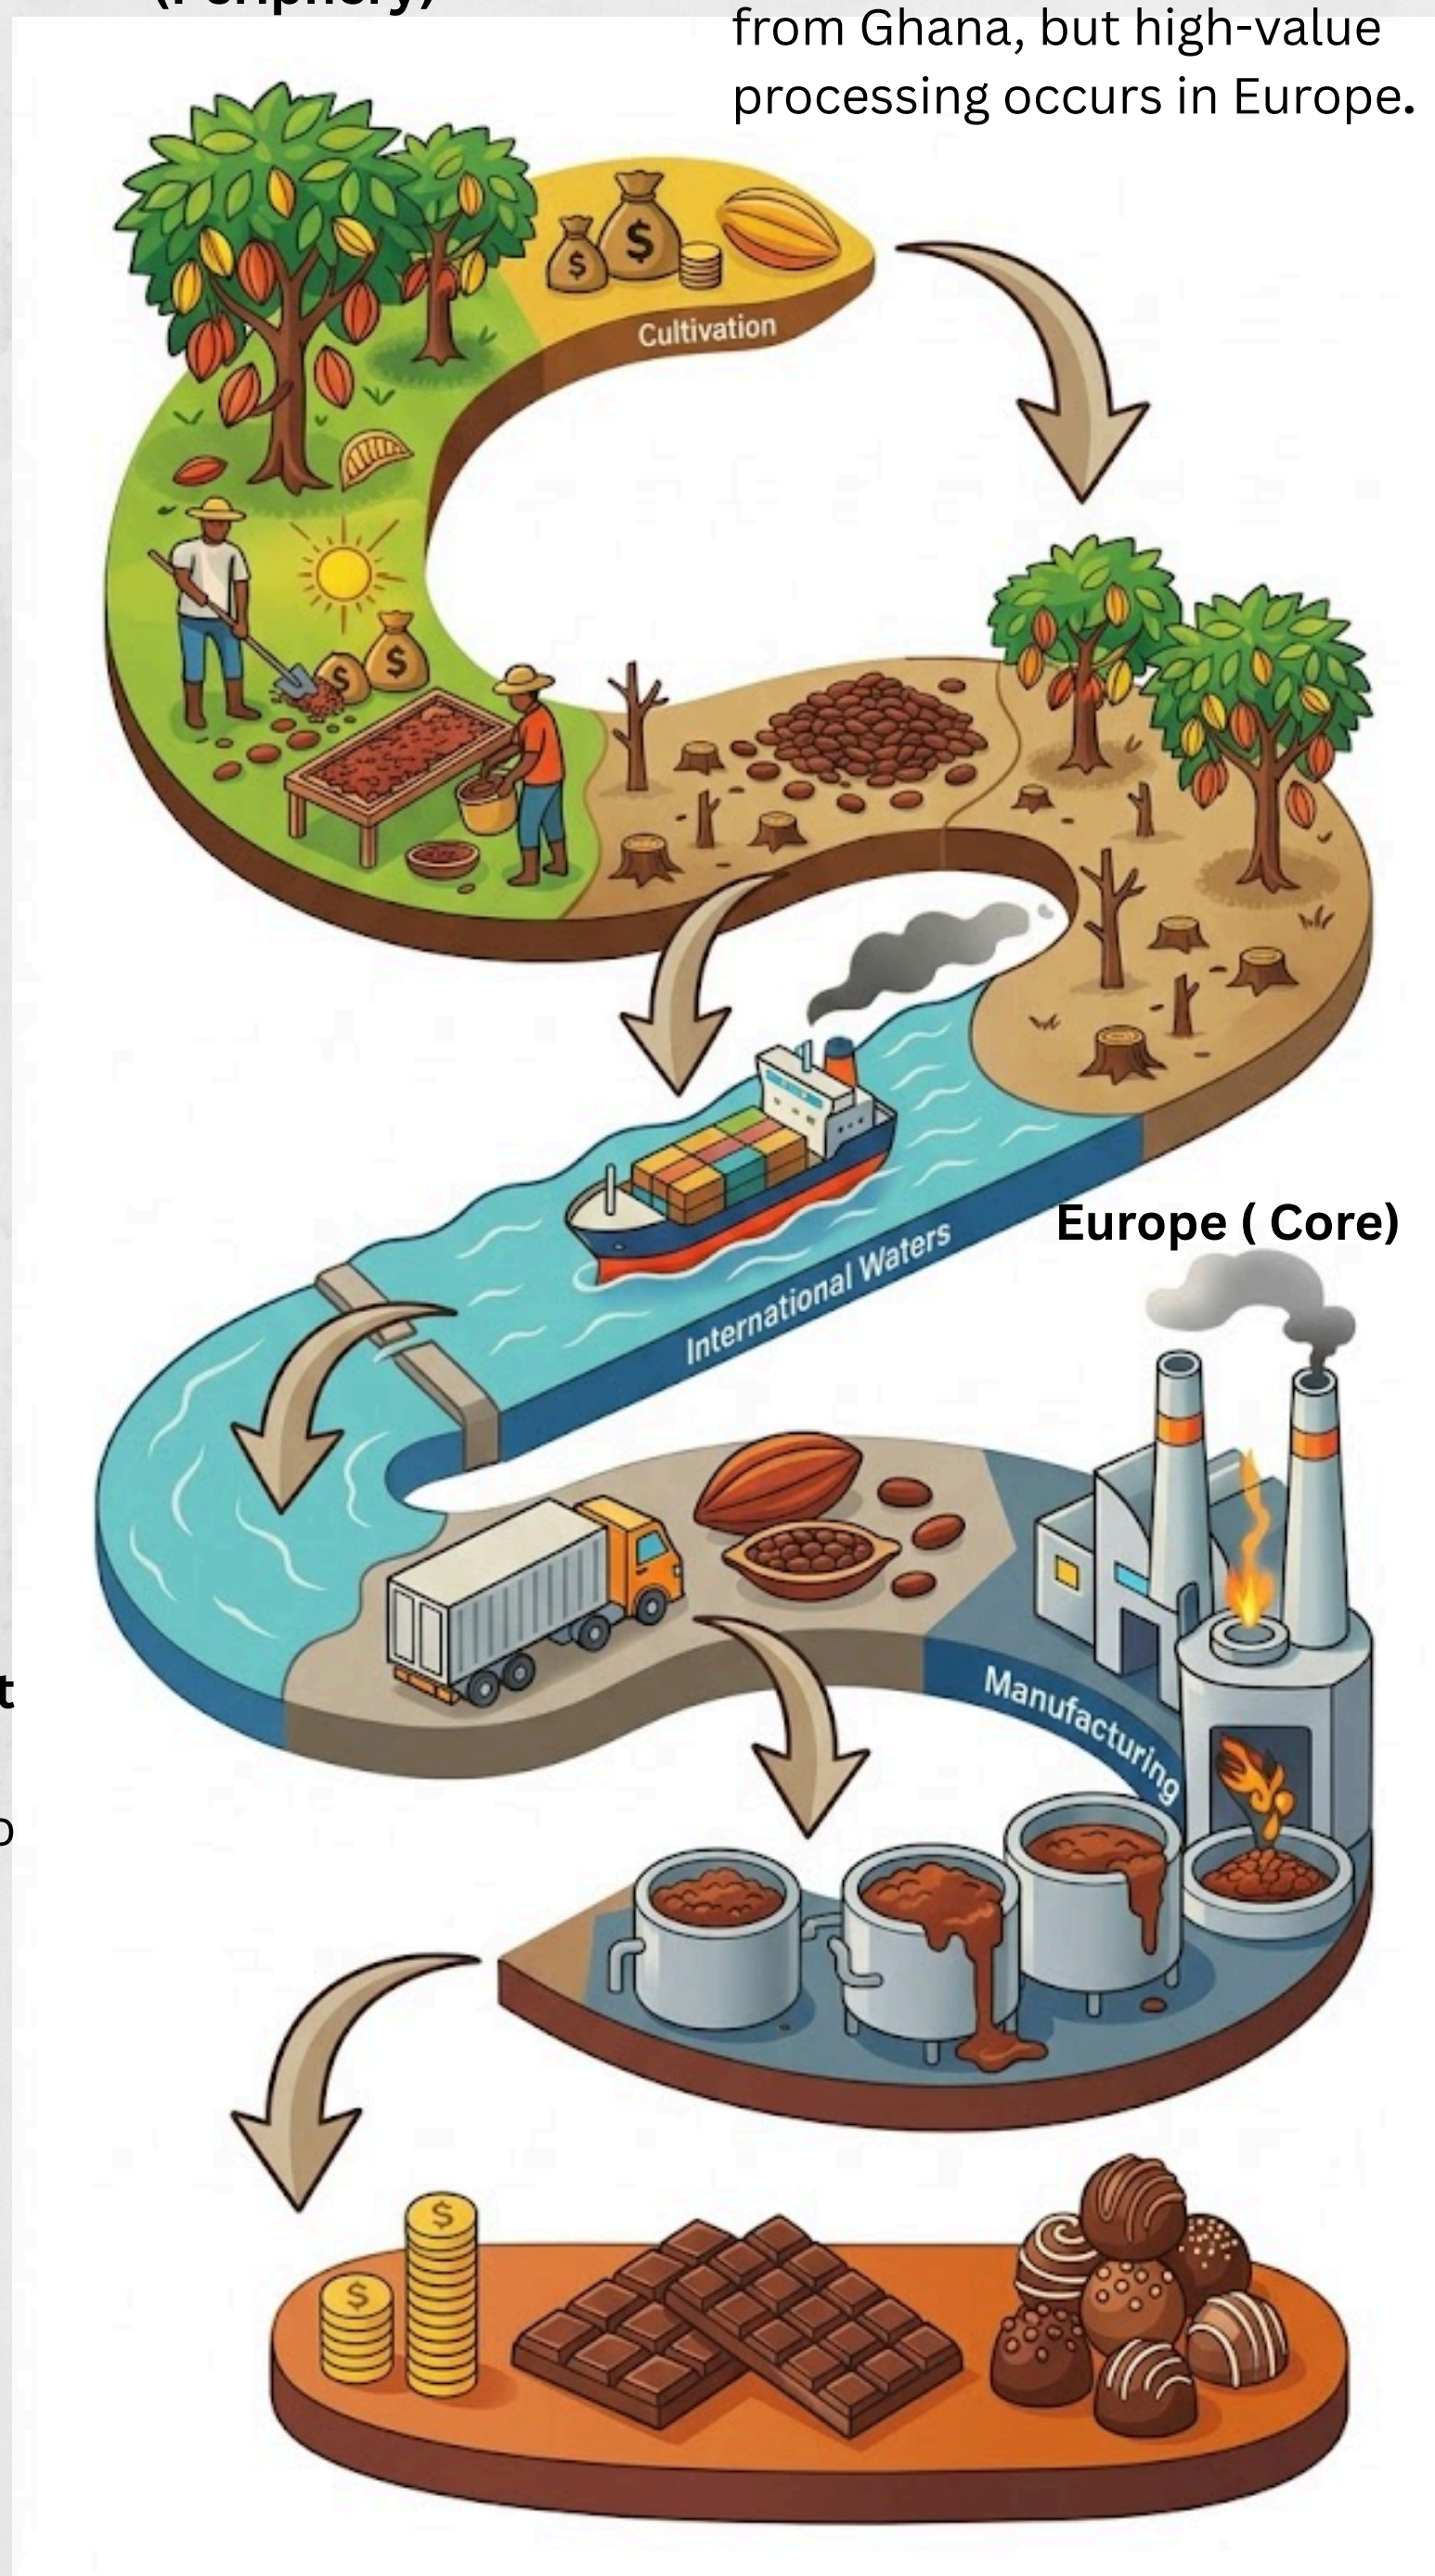

Carbon-Intensive Transit

Supporting Detail:
Beans travel via trucks to ports and energy-heavy factories in Europe.

Ghana (Periphery)

The Core-Periphery Model:

Raw beans are exported from Ghana, but high-value processing occurs in Europe.

Environmental Pressures

Supporting Detail:
Cocoa cultivation is linked to West African deforestation and loss of biodiversity

The Linear Economy

Supporting Detail:
The chain follows an "extract-process-consume-dispose" flow rather than a circular model

The Linear Economy

Supporting Detail:
The chain follows an "extract-process-consume-dispose" flow rather than a circular model.
